

1.6.12

EE25BTECH11062 - Vivek K Kumar

Question:

Show that point $\begin{pmatrix} -4 \\ 2 \end{pmatrix}$ lies on the line segment joining the points $\mathbf{A} \begin{pmatrix} -4 \\ 6 \end{pmatrix}$ and $\mathbf{B} \begin{pmatrix} -4 \\ -6 \end{pmatrix}$.

Solution:

Name	Point
$\begin{pmatrix} -4 \\ 6 \end{pmatrix}$	Point A
$\begin{pmatrix} -4 \\ -6 \end{pmatrix}$	Point B
$\begin{pmatrix} -4 \\ 2 \end{pmatrix}$	Point C

TABLE 0: Variables Used

The Collinearity matrix is given by

$$(\mathbf{B} - \mathbf{A} \quad \mathbf{C} - \mathbf{A})^T = \begin{pmatrix} 0 & -12 \\ 0 & -4 \end{pmatrix} \quad (0.1)$$

$$\xleftrightarrow{R_2 \rightarrow R_2 - \frac{1}{3}R_1} \begin{pmatrix} 0 & -12 \\ 0 & 0 \end{pmatrix} \quad (0.2)$$

Since the rank of the Collinearity matrix is 1, the points are collinear
