2019

CS:Computer science and Engineering

- 1) The expenditure on the project _____ as follows: equipment Rs.20 lakhs, salaries Rs.12 lakhs, and contingency Rs.3 lakhs. **(GATE EE 2025)**
 - a) break down
 - b) break
 - c) breaks down
 - d) breaks
- 2) The search engine's business model _____ around the fulcrum of trust. **(GATE EE 2025)**
 - a) revolves
 - b) plays
 - c) sinks
 - d) bursts
- 3) Two cars start at the same time from the same location and go in the same direction. The speed of the first car is 50 km/h and the speed of the second car is 60 km/h. The number of hours it takes for the distance between the two cars to be 20 km is _____. **(GATE EE 2025)**
 - a) 1
 - b) 2
 - c) 3
 - d) 6
- 4) Ten friends planned to share equally the cost of buying a gift for their teacher. When two of them decided not to contribute, each of the other friends had to pay Rs.150 more. The cost of the gift was Rs. _____. **(GATE EE 2025)**
 - a) 666
 - b) 3000
 - c) 6000
 - d) 12000
- 5) A court is to a judge as _____ is to a teacher. **(GATE EE 2025)**
 - a) a student
 - b) a punishment
 - c) a syllabus
 - d) a school
- 6) The police arrested four criminals - P, Q, R and S. The criminals knew each other. They made the following statements:
 P says "Q committed the crime."
 Q says "S committed the crime."
 R says "I did not do it."
 S says "What Q said about me is false."

Assume only one of the arrested four committed the crime and only one of the statements made above is true. Who committed the crime? **(GATE EE 2025)**

- a) P
- b) R
- c) S
- d) Q

- 7) In the given diagram, teachers are represented in the triangle, researchers in the circle and administrators in the rectangle. Out of the total number of the people, the percentage of administrators shall be in the range of _____. **(GATE EE 2025)**

Fig. 7.

- a) 0 to 15
 - b) 16 to 30
 - c) 31 to 45
 - d) 46 to 60
- 8) A recent High Court judgement has sought to dispel the idea of begging as a disease - which leads to its stigmatization and criminalization - and to regard it as a symptom. The underlying disease is the failure of the state to protect citizens who fall through the social security net. Which one of the following statements can be inferred from the given passage? **(GATE EE 2025)**
- a) Beggars are lazy people who beg because they are unwilling to work
 - b) Beggars are created because of the lack of social welfare schemes
 - c) Begging is an offence that has to be dealt with firmly
 - d) Begging has to be banned because it adversely affects the welfare of the state
- 9) In a college, there are three student clubs. Sixty students are only in the Drama club, 80 students are only in the Dance club, 30 students are only in the Maths club, 40 students are in both Drama and Dance clubs, 12 students are in both Dance and Maths clubs, 7 students are in both Drama and Maths clubs, and 2 students are in all the clubs. If 75% of the students in the college are not in any of these clubs, then the total number of students in the college is _____. **(GATE EE 2025)**
- a) 1000
 - b) 975
 - c) 900
 - d) 225
- 10) Three of the five students allocated to a hostel put in special requests to warden . Given the floor plan of the vacant rooms ,select the allocation plan that will accomodate all their requests.
Request by X: Due to pollen allergy I want to avoid a wing next to the garden
Request by Y: I want to live as far from the washroom since I am very sensitive to smell
Request by Z:I belive in vasthu and so want to stay in the south-west wing
The shaded room are already occupied. WR is washroom **(GATE EE 2025)**

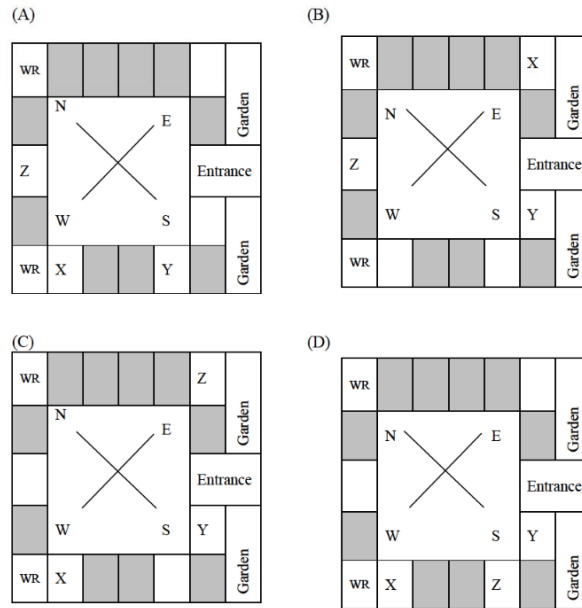

Fig. 10.

- 11) A certain processor uses a fully associative cache of size 16 kB. The cache block size is 16 bytes. Assume that the main memory is byte addressable and uses a 32-bit address. How many bits are required for the *Tag* and the *Index* fields respectively in the addresses generated by the processor? **(GATE EE 2025)**
- 24 bits and 0 bits
 - 28 bits and 4 bits
 - 24 bits and 4 bits
 - 28 bits and 0 bits
- 12) The chip select logic for a certain DRAM chip in a memory system design is shown below. Assume that the memory system has 16 address lines denoted by A_{15} to A_0 . What is the range of addresses (in hexadecimal) of the memory system that can get enabled by the chip select (CS) signal? **(GATE EE 2025)**

Fig. 12.

- C800 to CFFF
 - CA00 to CAFF
 - C800 to C8FF
 - DA00 to DFFF
- 13) Which one of the following kinds of derivation is used by LR parsers? **(GATE EE 2025)**

- a) Leftmost
- b) Leftmost in reverse
- c) Rightmost
- d) Rightmost in reverse

14) In 16-bit 2's complement representation, the decimal number -28 is: **(GATE EE 2025)**

- a) 1111 1111 1110 0100
- b) 0000 0000 1110 0100
- c) 1111 1111 1110 0100
- d) 1000 0000 1110 0100

15) Let $U = \{1, 2, \dots, n\}$. Let $A = \{(X, Y) \mid X \in \mathcal{X}, X \subseteq U\}$. Consider the following two statements on $|A|$.

- a) I. $|A| = n2^{n-1}$
- b) II. $|A| = \sum_{k=1}^n k \binom{n}{k}$

Which of the above statements is/are TRUE?

(GATE EE 2025)

- a) Only I
- b) Only II
- c) Both I and II
- d) Neither I nor II

16) Which one of the following is NOT a valid identity? **(GATE EE 2025)**

- a) $(x \oplus y) \oplus z = x \oplus (y \oplus z)$
- b) $(x + y) \oplus z = x \oplus (y + z)$
- c) $x \otimes y = x + y$, if $x = y = 0$
- d) $x \oplus y = (x'y + xy')$

17) If L is a regular language over $\Sigma = \{a, b\}$, which one of the following languages is NOT regular? **(GATE EE 2025)**

- a) $L \cdot L^R = \{xy \mid x \in L, y^R \in L\}$
- b) $\{ww^R \mid w \in L\}$
- c) $\text{Prefix}(L) = \{x \in \Sigma^* \mid \exists y \in \Sigma^* \text{ such that } xy \in L\}$
- d) $\text{Suffix}(L) = \{y \in \Sigma^* \mid \exists x \in \Sigma^* \text{ such that } xy \in L\}$

18) Consider $Z = X - Y$, where X, Y and Z are all in sign-magnitude form. X and Y are each represented in n bits. To avoid overflow, the representation of Z would require a minimum of: **(GATE EE 2025)**

- a) n bits
- b) $n - 1$ bits
- c) $n + 1$ bits
- d) $n + 2$ bits

19) Let X be a square matrix. Consider the following two statements on X .

- I. X is invertible.
- II. Determinant of X is non-zero.

Which one of the following is TRUE?

(GATE EE 2025)

- a) I implies II; II does not imply I.
- b) II implies I; I does not imply II.
- c) I does not imply II; II does not imply I.
- d) I and II are equivalent statements.

20) Let G be an arbitrary group. Consider the following relations on G :

$$R_1 : \forall a, b \in G, a R_1 b \text{ if and only if } \exists g \in G \text{ such that } a = g^{-1}bg$$

$$R_2 : \forall a, b \in G, a R_2 b \text{ if and only if } a = b^{-1}$$

Which of the above is/are equivalence relation/relations?

(GATE EE 2025)

- a) R_1 and R_2
- b) R_1 only
- c) R_2 only
- d) Neither R_1 nor R_2

21) Consider the following two statements about database transaction schedules:

- 1. Strict two-phase locking protocol generates conflict serializable schedules that are also recoverable.
- 2. Timestamp-ordering concurrency control protocol with Thomas' Write Rule can generate view serializable schedules that are not conflict serializable.

Which of the above statements is/are TRUE?

(GATE EE 2025)

- a) I only
- b) II only
- c) Both I and II
- d) Neither I nor II

22) Let G be an undirected complete graph on n vertices, where $n > 2$. Then, the number of different Hamiltonian cycles in G is equal to

(GATE EE 2025)

- a) $n!$
- b) $(n - 1)!$
- c) 1
- d) $\frac{(n - 1)!}{2}$

23) Compute

$$\lim_{x \rightarrow 3} \frac{x^4 - 81}{2x^2 - 5x - 3}$$

(GATE EE 2025)

- a) 1
- b) $\frac{53}{12}$
- c) $\frac{108}{7}$
- d) Limit does not exist

24) Which one of the following statements is NOT correct about the B+ tree data structure used for creating an index of a relational database table?

(GATE EE 2025)

- a) B+ Tree is a height-balanced tree
- b) Non-leaf nodes have pointers to data records
- c) Key values in each node are kept in sorted order
- d) Each leaf node has a pointer to the next leaf node

25) For $\Sigma = \{a, b\}$, let us consider the regular language

$$L = \{ x \mid x = a^{2+3k} \text{ or } x = b^{10+12k}, k \geq 0 \}$$

Which one of the following can be a pumping length (the constant guaranteed by the pumping lemma) for L ?

(GATE EE 2025)

- a) 3
- b) 5
- c) 9
- d) 24

26) Which of the following protocol pairs can be used to send and retrieve e-mails (in that order)? (GATE EE 2025)

- a) IMAP, POP3

- b) SMTP, POP3
- c) SMTP, MIME
- d) IMAP, SMTP

27) The following C program is executed on a Unix/Linux system:

```
[language=C]
#include <unistd.h>
int main()
{
    int i;
    for (i = 0; i < 10; i++)
        if (i & 2 == 0) fork();
    return 0;
}
```

The total number of child processes created is _____.

(GATE EE 2025)

28) Consider the following C program:

```
[language=C]
#include <stdio.h>
int jumble(int x, int y) {
    x = 2 * x + y;
    return x;
}
int main() {
    int x = 2, y = 5;
    y = jumble(y, x);
    x = jumble(y, x);
    printf("%d \n", x);
    return 0;
}
```

The value printed by the program is _____.

(GATE EE 2025)

29) Consider the grammar given below:

$$S \rightarrow Aa \quad A \rightarrow BD \quad B \rightarrow b \mid c \quad D \rightarrow d \mid \epsilon$$

Let $a, b, d, \$$ be indexed as follows:

a	b	d	\$
3	2	1	0

Compute the FOLLOW set of the non-terminal B and write the index values for the symbols in the FOLLOW set in the descending order. (For example, if the FOLLOW set is $\{a, b, d, \$\}$, then the answer should be 3210.)

(GATE EE 2025)

30) An array of 25 distinct elements is to be sorted using quicksort. Assume that the pivot element is chosen uniformly at random. The probability that the pivot element gets placed in the worst possible location in the first round of partitioning (rounded off to 2 decimal places) is _____.

(GATE EE 2025)

31) The value of $3^{51} \bmod 5$ is _____.

(GATE EE 2025)

- 32) Two numbers are chosen independently and uniformly at random from the set $\{1, 2, \dots, 13\}$. The probability (rounded off to 3 decimal places) that their 4-bit (unsigned) binary representations have the same most significant bit is _____.

(GATE EE 2025)

- 33) Consider three concurrent processes P_1, P_2 and P_3 as shown below, which access a shared variable D that has been initialized to 100.

P1	P2	P3
$D = D + 20$	$D = D - 50$	$D = D + 10$
\vdots	\vdots	\vdots

The processes are executed on a uniprocessor system running a time-shared operating system. If the minimum and maximum possible values of D after the three processes have completed execution are X and Y respectively, then the value of $Y - X$ is _____.

(GATE EE 2025)

- 34) Consider the following C program:

```
#include <stdio.h>
int main(){
    int arr[]={1,2,3,4,5,6,7,8,9,0,1,2,5}, *ip=arr+4;
    printf("%d\n", ip[1]);
    return 0;
}
```

The number that will be displayed on execution of the program is _____. (GATE EE 2025)

- 35) Consider a sequence of 14 elements:

$$A = [-5, -10, 6, 3, -1, -2, 13, 4, -9, -1, 4, 12, -3, 0]$$

The subsequence sum

$$S(i, j) = \sum_{k=i}^j A[k].$$

Determine the maximum of $S(i, j)$, where $0 \leq i \leq j < 14$. (Divide and conquer approach may be used.)

(GATE EE 2025) Answer: _____.

- 36) Consider the following C function:

```
void convert(int n){
    if(n<0)
        printf("%d",n);
    else {
        convert(n/2);
        printf("%d",n&2);
    }
}
```

Which one of the following will happen when the function convert is called with any positive integer n as argument?

(GATE EE 2025)

- It will print the binary representation of n and terminate
- It will print the binary representation of n in the reverse order and terminate
- It will print the binary representation of n but will not terminate

d) It will not print anything and will not terminate

37) Consider the following C program:

```
#include <stdio.h>
int r(){
    static int num = 7;
    return num--;
}

int main(){
    for(r(); r(); r())
        printf("%d",r());
    return 0;
}
```

Which one of the following values will be displayed on execution of the program? (GATE EE 2025)

- a) 41
- b) 52
- c) 63
- d) 630

38) Consider three machines M, N, and P with IP addresses 100.10.5.2, 100.10.5.5, and 100.10.5.6 respectively. The subnet mask is set to 255.255.255.252 for all the three machines. Which one of the following is true? (GATE EE 2025)

- a) M, N, and P all belong to the same subnet
- b) Only M and N belong to the same subnet
- c) Only N and P belong to the same subnet
- d) M, N, and P belong to three different subnets

39) Suppose that in an IP-over-Ethernet network, a machine X wishes to find the MAC address of another machine Y in its subnet. Which one of the following techniques can be used for this? (GATE EE 2025)

- a) X sends an ARP request packet to the local gateway's IP address which then finds the MAC address of Y and sends to X
- b) X sends an ARP request packet to the local gateway's MAC address which then finds the MAC address of Y and sends to X
- c) X sends an ARP request packet with broadcast MAC address in its local subnet
- d) X sends an ARP request packet with broadcast IP address in its local subnet

40) Consider three 4-variable functions f_1, f_2, f_3 which are expressed in sum-of-minterms as

$$f_1 = \Sigma(0, 2, 5, 8, 14), \quad f_2 = \Sigma(2, 3, 6, 8, 14, 15), \quad f_3 = \Sigma(2, 7, 11, 14).$$

For the following circuit with one AND gate and one XOR gate, the output function f can be expressed as: (GATE EE 2025)

- a) $\Sigma(7, 8, 11)$
- b) $\Sigma(2, 7, 8, 11, 14)$
- c) $\Sigma(2, 14)$
- d) $\Sigma(0, 2, 3, 5, 6, 7, 8, 11, 14, 15)$

41) Which one of the following languages over $\Sigma = \{a, b\}$ is **NOT** context-free? (GATE EE 2025)

- a) $\{ww^R \mid w \in \{a, b\}^*\}$
- b) $\{wa^n b^n w^R \mid w \in \{a, b\}^*, n \geq 0\}$
- c) $\{wa^n w^R b^n \mid w \in \{a, b\}^*, n \geq 0\}$

Fig. 40.

d) $\{a^i b^j \mid i \in \{n, 3n, 5n\}, n \geq 0\}$

- 42) Let the set of functional dependencies $F = \{QR \rightarrow S, R \rightarrow P, S \rightarrow Q\}$ hold on a relation schema $X = (PQRS)$. X is not in BCNF. Suppose X is decomposed into two schemas Y and Z , where $Y = (PR)$ and $Z = (QRS)$.

Consider the two statements given below.

I. Both Y and Z are in BCNF

II. Decomposition of X into Y and Z is dependency preserving and lossless

Which of the above statements is/are correct?

(GATE EE 2025)

- a) Both I and II
- b) I only
- c) II only
- d) Neither I nor II

- 43) Assume that in a certain computer, the virtual addresses are 64 bits long and the physical addresses are 48 bits long. The memory is word addressable. The page size is 8 KB and the word size is 8 bytes. The Translation Look-aside Buffer (TLB) in the address translation path has 128 valid entries. At most how many distinct virtual addresses can be translated without any TLB miss? **(GATE EE 2025)**

- a) 16×2^{10}
- b) 256×2^{10}
- c) 4×2^{20}
- d) 8×2^{20}

(GATE EE 2025)

- 44) Consider the following sets:

- S1. Set of all recursively enumerable languages over the alphabet $\{0, 1\}$
- S2. Set of all syntactically valid C programs
- S3. Set of all languages over the alphabet $\{0, 1\}$
- S4. Set of all non-regular languages over the alphabet $\{0, 1\}$

Which of the above sets are uncountable?

(GATE EE 2025)

- a) S1 and S2
- b) S3 and S4
- c) S2 and S3
- d) S1 and S4

(GATE EE 2025)

- 45) Consider the first order predicate formula φ :

$$\forall x [(\forall z z|x \Rightarrow (z = x) \vee (z = 1)) \Rightarrow \exists w (w > x) \wedge (\forall z z|w \Rightarrow (w = z) \vee (z = 1))].$$

Here " $a|b$ " denotes that a divides b , where a and b are integers. Consider the following sets:

- S1. $\{1, 2, 3, \dots, 100\}$
 S2. Set of all positive integers
 S3. Set of all integers

Which of the above sets satisfy φ ?

(GATE EE 2025)

- a) S1 and S2
 b) S1 and S3
 c) S2 and S3
 d) S1, S2 and S3

(GATE EE 2025)

- 46) Consider the following grammar and the semantic actions to support the inherited type declaration attributes. Let X_1, X_2, X_3, X_4, X_5 , and X_6 be the placeholders for the non-terminals D, T, L or $L1$ in the following table:

Production rule	Semantic action
$D \rightarrow T L$	$X_1.type = X_2.type$
$T \rightarrow \text{int}$	$T.type = \text{int}$
$T \rightarrow \text{float}$	$T.type = \text{float}$
$L \rightarrow L1, \text{id}$	$X_3.type = X_4.type; \text{addType}(\text{id.entry}, X_5.type)$
$L \rightarrow \text{id}$	$\text{addType}(\text{id.entry}, X_6.type)$

Which one of the following are the appropriate choices for X_1, X_2, X_3 , and X_4 ? (GATE EE 2025)

- a) $X_1 = L, X_2 = T, X_3 = L1, X_4 = L$
 b) $X_1 = T, X_2 = L, X_3 = L1, X_4 = T$
 c) $X_1 = L, X_2 = L, X_3 = L1, X_4 = T$
 d) $X_1 = T, X_2 = L, X_3 = T, X_4 = L$

- 47) There are n unsorted arrays: A_1, A_2, \dots, A_n . Assume that n is odd. Each of A_1, A_2, \dots, A_n contains n distinct elements. There are no common elements between any two arrays. The worst-case time complexity of computing the median of the medians of A_1, A_2, \dots, A_n is (GATE EE 2025)

- a) $O(n)$
 b) $O(n \log n)$
 c) $O(n^2)$
 d) $\Omega(n^2 \log n)$

- 48) Let G be any connected, weighted, undirected graph.

- I. G has a minimum spanning tree, in which, if no two edges of G have the same weight.
 II. If G has a unique minimum spanning tree, H , for every cut of G , there is a unique minimum-weight edge crossing the cut.

Which of the above two statements is/are TRUE?

(GATE EE 2025)

- a) I only
 b) II only
 c) Both I and II
 d) Neither I nor II

- 49) Consider the following snapshot of a system running n concurrent processes. Process i is holding X_i instances of a resource R , $1 \leq i \leq n$. Assume that all instances of R are currently in use. Further, for all i , process i can place a request for at most Y_i additional instances of R while holding the X_i instances it already has. Of the n processes, there are exactly two processes p and q such that $Y_p = Y_q = 0$. Which one of the following conditions guarantees that no other process apart from p and q can complete execution? (GATE EE 2025)

- a) $X_p + X_q < \min\{Y_k \mid 1 \leq k \leq n, k \neq p, k \neq q\}$
 b) $X_p + X_q < \max\{Y_k \mid 1 \leq k \leq n, k \neq p, k \neq q\}$
 c) $\min(X_p, X_q) \geq \min\{Y_k \mid 1 \leq k \leq n, k \neq p, k \neq q\}$
 d) $\min(X_p, X_q) \leq \max\{Y_k \mid 1 \leq k \leq n, k \neq p, k \neq q\}$

50) Consider the following statements:

I. The smallest element in a max-heap is always at a leaf node. II. The second largest element in a max-heap is always a child of the root node. III. A max-heap can be constructed from a binary search tree in $O(n)$ time. IV. A binary search tree can be constructed from a max-heap in $O(n)$ time.

Which of the above statements are TRUE?

(GATE EE 2025)

- a) I, II and III
 b) I, II and IV
 c) I, III and IV
 d) II, III and IV

51) Consider the following four processes with arrival times (in milliseconds) and their length of CPU bursts (in milliseconds) as shown below:

Process	Arrival Time	CPU Burst Time
P1	0	3
P2	1	1
P3	3	3
P4	4	2

These processes are run on a single processor using preemptive Shortest Remaining Time First scheduling algorithm. If the average waiting time of the processes is 1 millisecond, then the value of Z is _____. (GATE EE 2025)

52) The index node (inode) of a Unix-like file system has 12 direct, one single-indirect and one double-indirect pointers. The disk block size is 4 kB, and the disk address is 32-bits long. The maximum possible file size is (rounded off to 1 decimal place) ____ GB.

53) Consider the augmented grammar given below:

$$S' \rightarrow S$$

$$S \rightarrow (L) \mid id$$

$$L \rightarrow L, S \mid S$$

Let $I_0 = \text{CLOSURE}(\{[S' \rightarrow \cdot S]\})$. The number of items in the set $\text{GOTO}(I_0, ())$ is: _____. (GATE EE 2025)

54) Consider the following matrix:

$$R = \begin{pmatrix} 1 & 2 & 4 & 8 \\ 1 & 3 & 9 & 27 \\ 1 & 4 & 16 & 64 \\ 1 & 5 & 25 & 125 \end{pmatrix}$$

The absolute value of the product of Eigen values of R is _____.

(GATE EE 2025)

55) A certain processor deploys a single-level cache. The cache block size is 8 words and the word size is 4 bytes. The memory system has a 60-MHz clock. To service a cache miss, the memory controller first takes 1 cycle to accept the request, then takes 6 cycles to access the first word of the block, and 1 cycle to each of the eight words of the block, and finally transmits the 8 words of the requested block at the rate of 1 word per cycle. The maximum bandwidth of the memory system when the processor is running on the processor's instructions at zero load of operations is _____. (GATE EE 2025)

- 56) Let T be a full binary tree with 8 leaves. (A full binary tree has every leaf full.) Suppose two leaves a and b of T are chosen uniformly and independently at random. The expected value of the distance between a and b in T (i.e., the number of edges in the unique path between a and b) is (rounded off to 2 decimal places): _____. (GATE EE 2025)
- 57) Suppose Y is distributed uniformly in the open interval $(1, 6)$. The probability that the polynomial $3x^2 + 6xY + 3Y + 6$ has only real roots (rounded off to 1 decimal place) is _____. (GATE EE 2025)
- 58) Let E be the set of all bijections from $\{1, \dots, 5\}$ to itself. We denote the identity map by id , i.e., $id(x) = x, \forall x \in \{1, \dots, 5\}$. Let $\pi(x) = x_1 x_2 \dots x_5$, where $\pi \in E$, $x \in \{1, 2, \dots, 5\}$, and $\pi(x) = x_1, \pi(y) = x_2$, etc.

Consider the language

$$L = \{x \in \Sigma^* \mid f(x) = id\}.$$

The minimum number of states in any DFA accepting L is _____. (GATE EE 2025)

- 59) Consider that 15 machines need to be connected in a LAN using 8-port Ethernet switches. Assume that these switches do not have any separate uplink ports. The minimum number of switches needed is _____. (GATE EE 2025)
- 60) What is the minimum number of 2-input NAND gates required to implement a 4-variable function expressed in sum-of-minterms form as

$$f = \Sigma m(2, 0, 2, 5, 7, 8, 10, 13, 15)?$$

Assume that all the inputs and their complements are available.

(GATE EE 2025) Answer: _____.

- 61) A relational database contains two tables **Student** and **Performance** as shown below:

Student	
Roll_no	Student_name
1	Amit
2	Piyush
3	Pranav
4	Anupam
5	Smita

Performance		
Roll_no	Subject_code	Marks
1	C1	35
1	C2	45
2	C1	20
2	C2	30
3	C3	40
3	C4	90
4	C1	80
5	C2	32

The primary key of the Student table is Roll_no. For the Performance table, the columns Roll_no and Subject_code together form the primary key. Consider the SQL query given below:

```
SELECT S.Student_name, sum(P.Marks)
FROM Student S, Performance P
WHERE S.Roll_no = P.Roll_no
      AND P.Marks > 40
GROUP BY S.Student_name;
```

The number of rows returned by the above SQL query is: _____.

(GATE EE 2025)

- 62) Consider the following C program:

```
#include <stdio.h>
int main() {
    float sum = 0.0, j = 1.0, i = 2.0;
    while (i/j > 0.0625f) {
        j = j + j;
        sum = sum + 1/j;
        printf("%f\n", sum);
    }
}
```

```

    }
    return 0;
}

```

The number of times the variable sum will be printed, when the above program is executed, is _____.
(GATE EE 2025)

- 63) Consider the following C program:

```

#include <stdio.h>
int main() {
    int a[] = {2,4,6,8,10};
    int sum = 0, *b = a + 4;
    for (int i = 0; i < 5; i++) {
        sum = sum + (*b - i) - *(a + i);
    }
    printf("%d\n", sum);
    return 0;
}

```

The output of the above C program is _____. (GATE EE 2025)

- 64) In an RSA cryptosystem, the value of the public modulus parameter n is 3007. If it is also known that $\varphi(n) = 2880$, where $\varphi(\cdot)$ denotes Euler's Totient Function, then the prime factor of n which is greater than 50 is _____. (GATE EE 2025)

- 65) Consider the following relations $P(X, Y, Z)$, $Q(X, Y, T)$ and $R(Y, V)$:

P		
X	Y	Z
X1	Y1	Z1
X2	Y2	Z2
X3	Y1	Z3
X2	Y4	Z4

Q		
X	Y	T
X2	Y1	2
X1	Y2	3
X1	Y1	6
X3	Y3	5
X3	Y3	1

R	
Y	V
Y1	V1
Y2	V1
Y3	V3
Y3	V3
Y3	V2

How many tuples will be returned by the following relational algebra query?

$$\Pi_x(\sigma_{(P.Y=R.Y \vee R.V=V2)}(P \times R) - \Pi_x(\sigma_{(Q.Y=R.Y \vee Q.T>2)}(Q \times R))$$

(GATE EE 2025) Answer: _____.
