

# 2025-XH-'1-65'

EE25BTECH11020 - Darsh Pankaj Gajare

- 1) If '→' denotes increasing order of intensity, then the meaning of the words (*simmer* → *seethe* → *smolder*) is analogous to [*break* → *raze* → \_\_\_\_\_]. Which one of the given options is appropriate to fill the blank? (GATE EE 2025)
  - a) obfuscate
  - b) obliterate
  - c) fracture
  - d) fissure
- 2) In a locality, the houses are numbered in the following way: The house-numbers on one side of a road are consecutive odd integers starting from 301, while the house-numbers on the other side of the road are consecutive even numbers starting from 302. The total number of houses is the same on both sides of the road. If the difference of the sum of the house-numbers between the two sides of the road is 27, then the number of houses on each side of the road is: (GATE EE 2025)
  - a) 27
  - b) 52
  - c) 54
  - d) 26
- 3) For positive integers  $p$  and  $q$ , with  $\frac{p}{q} \neq 1$ ,  $\left(\frac{p}{q}\right)^q = p^{\left(\frac{p}{q}-1\right)}$ , Then, (GATE EE 2025)
  - a)  $q^p = p^q$
  - b)  $q^p = p^{2q}$
  - c)  $\sqrt[q]{q} = \sqrt{p}$
  - d)  $\sqrt[q]{q} = \frac{q}{\sqrt{p}}$
- 4) Which one of the given options is a possible value of  $X$  in the following sequence? 3, 7, 15,  $X$ , 63, 127, 255 (GATE EE 2025)
  - a) 35
  - b) 40
  - c) 45
  - d) 31
- 5) On a given day, how many times will the second-hand and the minute-hand of a clock cross each other during the clock time 12 : 05 : 00 hours to 12 : 55 : 00 hours? (GATE EE 2025)
  - a) 51
  - b) 49
  - c) 50
  - d) 55
- 6) In the given text, the blanks are numbered (i) – (iv). Select the best match for all the blanks. From the ancient Athenian arena to the modern Olympic stadiums, athletics (i) the potential for a spectacle. The crowd (ii) with bated breath as the Olympian artist twists his body, stretching the javelin behind him. Twelve strides in, he begins to cross-step. Six cross-steps (iii) in an abrupt stop on his left foot. As his body (iv) like a door turning on a hinge, the javelin is launched skyward at a precise angle. (GATE EE 2025)
  - a) (i) hold    (ii) waits    (iii) culminates    (iv) pivot
  - b) (i) holds    (ii) wait    (iii) culminates    (iv) pivot
  - c) (i) hold    (ii) wait    (iii) culminate    (iv) pivots
  - d) (i) holds    (ii) waits    (iii) culminate    (iv) pivots
- 7) Three distinct sets of indistinguishable twins are to be seated at a circular table that has 8 identical chairs. Unique seating arrangements are defined by the relative positions of the people. How many unique seating arrangements are possible such that each person is sitting next to their twin? (GATE EE 2025)

- a) 12                      b) 14                      c) 10                      d) 28

8) The chart given below compares the Installed Capacity ( $MW$ ) of four power generation technologies, T1, T2, T3, and T4, and their Electricity Generation ( $MWh$ ) in a time of 1000 hours ( $h$ ).

Fig. 1. Power Generation Technology

**The Capacity Factor of a power generation technology is:**  $\text{Capacity Factor} = \frac{\text{Electricity Generation (MWh)}}{\text{Installed Capacity (MW)} \times 1000 (h)}$   
Which one of the given technologies has the highest Capacity Factor? (GATE EE 2025)

- a) T1                      b) T2                      c) T3                      d) T4

9) In the  $4 \times 4$  array shown below, each cell of the first three columns has either a cross (X) or a number, as per the given rule. **Rule:** The number in a cell represents the count of crosses around its immediate neighboring cells (*left, right, top, bottom, diagonals*). As per this rule, the **maximum** number of crosses possible in the empty column is:

1	1	2	
2	X	3	
2	X	4	
1	2	X	

(GATE EE 2025)

- a) 0                      b) 1                      c) 2                      d) 3

10) During a half-moon phase, the Earth-Moon-Sun form a right triangle. If the Moon-Earth-Sun angle at this half-moon phase is measured to be  $89.85^\circ$ , the ratio of the Earth-Sun and Earth-Moon distances is closest to: (GATE EE 2025)

- a) 328                      b) 382                      c) 238                      d) 283

11) Amma's tone in the context of the given passage is that of: For Amma, the difference between men and women was a kind of discrimination and inequality; she felt strongly about women's rights but was not familiar with concepts like gender and patriarchy. She would have dismissed Betty Friedan because she was predominantly dealing with the problems of white middle-class women in

the United States. Amma, and women of her generation, could de-link the oppression of women from the wider struggle for the liberation of human beings from class exploitation and imperialism. So Amma continued to play her role as mother and wife, but would often complain: 'I am a doormat on which everyone wipes their emotional dirt off'. (GATE EE 2025)

- a) Compromise                      b) Protest                      c) Contentment                      d) Resignation

- 12) Fill in the blanks by choosing the correct sequence for the following passage: I am wearing for the first time some (i)\_\_\_\_\_ that I have never been able to wear for long at a time, as they are horribly tight. I usually put them on just before giving a lecture. The painful pressure they exert on my feet goads my oratorical capacities to their utmost. This sharp and overwhelming pain makes me sing like a nightingale or like one of those Neapolitan singers who also wear (ii)\_\_\_\_\_ that are too tight. The visceral physical longing, the overwhelming torture provoked by my (iii)\_\_\_\_\_ forces me to extract from words distilled and sublime truths, generalized by the supreme inquisition of the pain my (iv)\_\_\_\_\_ suffer. (GATE EE 2025)

- a) (i) patent-leather belt (ii) belts (iii) patent-leather (i) patent-leather shoes (ii) shoes (iii) patent-leather belt (iv) waist leather shoes (iv) feet  
b) (i) patent-leather shoes (ii) bands (iii) patent (i) patent-leather jacket (ii) jacket (iii) patent-leather bands (iv) wrist leather jacket (iv) body

- 13) The appropriate synonym for the word 'ignite' in the following passage will be: Spirituality must be integrated with education. Self-realization is the focus. Each one of us must become aware of our higher self. We are links of a great past to a grand future. We should ignite our dormant inner energy and let it guide our lives. The radiance of such minds embarked on constructive endeavor will bring peace, prosperity and bliss to this nation. (GATE EE 2025)

- a) Encourage                      b) Simulate                      c) Dissipate                      d) Engross

- 14) Which of the following sentences is punctuated correctly? (GATE EE 2025)

- a) One day, I'll write a book, 'I said'. Not just a thriller but a real book, about real people.      æ) 'One day I'll write a book', I said. 'Not just a thriller but, a real book, about real people'.  
b) 'One day I'll write a book', I said, 'not just a thriller, but a real book, about real people.'      ad) 'One day I'll write a book', I said, not just a thriller, but a real book, about real people.'

- 15) Fill in the blanks with the correct combination of tenses for the given sentence: Darwin's work (i)\_\_\_\_\_ a related effect that (ii)\_\_\_\_\_ influenced the development of environmental politics - a 'decentering' of the human being. (GATE EE 2025)

- a) (i) have (ii) had                      b) (i) had (ii) have                      c) (i) had (ii) has                      d) (i) has (ii) have

- 16) Which of the following options holds similar relationship as the words, 'Music: Notes'? (GATE EE 2025)

- a) Water: Cold drink                      b) Paper: Class Notes                      c) House: Bricks                      d) Graphite: Charcoal

- 17) In a particular code, if "RAMAN" is written as 52 and "MAP" is written as 33, then how will you code "CLICK"? (GATE EE 2025)

- a) 37                      b) 43                      c) 51                      d) 38

- 18) On the basis of the statements given below, which valid assumption (s) can be made? Statements:

- a) Life has suffering
- b) Desire is the cause of suffering
- c) The end of desire is the end of suffering
- d) Desire can be reduced by following the noble eightfold path

Assumptions:

- |                            |                            |                           |                           |
|----------------------------|----------------------------|---------------------------|---------------------------|
| a) Suffering is because of | b) Life is not always full | c) The eightfold path can | d) Suffering is caused by |
| wants                      | of suffering               | reduce suffering          | life                      |

(GATE EE 2025)

- a) Only 1, 3 and 4      b) Only 1, 2 and 3      c) Only 1 and 4      d) Only 2 and 3

19) If 'KARAMCHAND' is coded as 'ICPCKEFCFLF' what should be the code of 'CREATION'?  
(GATE EE 2025)

- a) ATCCRRKMP      b) ETGCVKQP      c) APCCRJMP      d) ETCGKRPM

20) Given an input line of numbers and words, a machine rearranges them following a particular rule in each step. Here is an illustration of an input and rearrangement sequence (*Step 1 to Step 5*):

Input: 61 wb ob 48 45 29 34 sb pb lb

Step 1: lb wb ob 48 45 29 34 sb pb 61

Step 2: lb ob wb 45 29 34 sb pb 61 48

Step 3: lb ob pb wb 29 34 sb 61 48 45

Step 4: lb ob pb sb wb 29 61 48 45 34

Step 5: lb ob pb sb wb 61 48 45 34 29

Step 5 is the last step of the above arrangement.

Based on the rules followed in the above steps, answer the following question:

Input: cb kb eb 58 49 23 38 jb nb gb 69 82

Which of the following represents the position of 58 in the fourth step?

(*Step – 5 is the last step of the arrangement.*)

(GATE EE 2025)

- a) Second from the left    b) Fourth from the right    c) Third from the right    d) Seventh from the left

21) In a certain type of code, 'they play cricket together' is written as 'mv kb lb iv'; 'they score maximum points' is written as 'gb lb mb kv'; 'cricket score earned points' is written as 'mb gv kb kv' and 'points are earned together' is written as 'kv mv ob gv.' What is the code for 'earned maximum points'?  
(GATE EE 2025)

- a) gv gb kv      b) mv kb mb      c) lb iv ob      d) ob mv iv

22) Which of the statement (s) about the passage weaken (s) the argument presented? Scientists associate large brains with greater intelligence. However, in the evolutionary context it has also been identified that beyond a point, the size of the brain has not increased and yet after a particular period, in spite of no significant change in brain size humans have made significant progress. Certain researchers propose that this is because, while the overall brain size may not have changed, marked structural changes can be noticed in specific structures that run parallel to increase in human intelligence.  
(GATE EE 2025)

- a) Recent studies refute the hypothesis that region-specific brain development is necessarily associated with rapid human progress
- b) Neanderthal people's extinction was probably because of their brain size

- c) Homo Sapiens and its destruction in the future may happen because of its rapid brain development  
 d) Recent studies show that Neanderthal people, with relatively smaller brains, were capable of complex language and social activities
- 23) The narrator's use of I' in the given passage is/are: I have never been any good at the more lurid sort of writing. Psychopathic killers, impotent war-heroes, self-tortured filmstars, and seedy espionage agents must exist in the world, but strangely enough I do not care across them, and I prefer to write about the people and places I have known and the lives of those poets I have crossed. This crossing of paths makes for stories rather than novels, and although I have worked in both mediums, I am happier being a short-story writer than a novelist. (GATE EE 2025)
- a) Self-conscious  
 b) Apologetic and regretful  
 c) Confessional and communicating  
 d) Egotistical and vain
- 24) Which of the following recommended action (s) seem to be appropriate with the stated problem? Stated problem: Many students at educational institutes do not attend classes in the post-pandemic scenario. (GATE EE 2025)
- a) Disciplinary action against all students should be taken as a warning.  
 b) Counselling sessions should be organized to address the issues such students face.  
 c) Surveys should be conducted to identify the reasons for their absence.  
 d) Course content should immediately be changed.
- 25) Read the passage and identify the statement (s) which follow (s) from it: The purpose of this work is to inform educators about the brain science related to emotion and learning, and, more important, to offer strategies to apply these understandings to their own teaching. Although many of the approaches I describe will be familiar, integrating the tiers of emotion and the brain may be a new concept. As an educator I had been trained in how to deliver content and organize my lessons, but I had not been taught how to design learning experiences that support emotions for learning. (GATE EE 2025)
- a) The author wishes, through his work, to inform us about brain science and learning.  
 b) The author, through his work, wishes to offer strategies to apply our learnings to our teaching.  
 c) The author feels that the newness of his approach lies in linking emotion-oriented approach to health.  
 d) The author wants to use emotions as a strategy for learning.
- 26) If A says that his mother is the daughter of B's mother, then how is B related to A? (GATE EE 2025)
- a) Uncle  
 b) Aunt  
 c) Father  
 d) Brother
- 27) Which one of the following measures in the Keynesian framework is adopted to tame inflation in an economy? (GATE EE 2025)
- a) Reduction in government spending  
 b) Reduction in the bank rate  
 c) Reduction in the repo rate  
 d) Increase in merchandise exports
- 28) If the difference between actual GDP and the trend output varies inversely with the difference between actual unemployment rate and the natural rate of unemployment, then such a relationship is called the (GATE EE 2025)
- a) Okun's law  
 b) New Keynesian aggregate supply curve  
 c) Taylor Rule  
 d) New Keynesian Phillips curve
- 29) In the sticky-price model of aggregate supply, if none of the firms in the market have flexible prices, then the short-run aggregate supply curve will be (GATE EE 2025)

- a) horizontal  
b) vertical
- c) steeper than it would be if some firms had flexible prices  
d) upward sloping to the right
- 30) When transfer of income happens from the “not richer” individual to the “not poorer” individual, then such a transfer is known as (GATE EE 2025)
- a) Regressive transfer    b) Additive transfer    c) Direct transfer    d) Indirect transfer
- 31) In the context of the Harris-Todaro model of rural-urban migration, which one of the following is TRUE? (GATE EE 2025)
- a) Unemployment in the urban sector emerges because rural-urban migration occurs primarily due to the higher expected wage income in the urban sector  
b) Unemployment in the urban sector emerges because rural workers migrate to the cities and towns due to the expected shortage of unskilled labour in the urban sector  
c) Unemployment in the urban sector emerges because the rural wage rate is institutionally fixed by the local body at a higher level than the urban wage rate  
d) Unemployment in the rural sector emerges because urban workers migrate to the rural sector due to the higher expected wage income in the advanced economies
- 32) The Minimum Support Prices in India are notified based on the recommendations of which one among the following Commissions? (GATE EE 2025)
- a) Commission for Agricultural Costs and Prices  
b) Commission for Farmers’ Benefits and Costs  
c) Commission for Agricultural Subsidy Costs and Prices  
d) Commission for Agricultural Subsidy Benefits and Costs
- 33) In an economy, the dependency ratio is the ratio of (GATE EE 2025)
- a) non-working age group population to the working age group population  
b) number of children to adults in the total population  
c) number of unemployed to employed workers in the total labour force  
d) total foreign aids and grants to the total (*net*) factor income from abroad
- 34) Which one of the following is NOT a source of finance of the Government of India? (GATE EE 2025)
- a) Land revenue    b) Income tax    c) Corporate tax    d) Import duty
- 35) In the Keynesian closed economy *IS-LM* model, where interest rate is plotted along the vertical axis and output is plotted along the horizontal axis, the product market schedule will be (GATE EE 2025)
- a) relatively steeper if the interest elasticity of investment is low  
b) relatively steeper, the higher the marginal propensity to save  
c) relatively steeper if the interest elasticity of investment is very high  
d) relatively flatter when the interest elasticity of money demand is very high
- 36) In the Keynesian system, the speculative demand for money arises because of (GATE EE 2025)
- a) uncertainty of future interest rates  
b) uncertainty regarding bond prices and associated capital gains  
c) unexpected out-of-pocket expenditure  
d) the gap that emerges between income and sudden eventual expenditure
- 37) Which of the following statements is/are TRUE? (GATE EE 2025)
- a) A firm experiences economies of scale when an increase in its output of a good or service brings a reduction in the average total cost of production

- b) A firm experiences economies of scope when an increase in its range of goods produced brings down the average total cost of production
- c) A firm experiences economies of scale when an increase in the range of products produced brings down the short-run average total cost of production
- d) A firm experiences economies of scope when an increase in its output of a good or service brings a reduction in the marginal cost of production
- 38) Let  $x_1, x_2, \dots, x_n$  be an independently, and identically distributed (*iid*) random sample drawn from a population that follows the Normal Distribution  $N(\mu, \sigma^2)$ , where both the mean ( $\mu$ ) and variance ( $\sigma^2$ ) are unknown. Let  $\bar{x}$  be the sample mean. The maximum likelihood estimator (*MLE*) of the variance ( $\hat{\sigma}_{MLE}^2$ ) is/are then characterized by (GATE EE 2025)
- a)  $\hat{\sigma}_{MLE}^2 = \frac{1}{n} \sum_{i=1}^n (x_i - \bar{x})^2$  which is a biased estimator of  $\sigma^2$
- b)  $\hat{\sigma}_{MLE}^2 = \frac{1}{n} \sum_{i=1}^n (x_i^2 - \bar{x}^2)$  which is a consistent estimator of  $\sigma^2$
- c)  $\hat{\sigma}_{MLE}^2 = \frac{1}{n-1} \sum_{i=1}^n (x_i - \bar{x})^2$  which is an unbiased estimator of  $\sigma^2$
- d)  $\hat{\sigma}_{MLE}^2 = \frac{1}{n-1} \sum_{i=1}^{n-1} (x_i - \bar{x})^2$  which is an unbiased and consistent estimator of  $\sigma^2$
- 39) Consider a simple pooled regression model:  $y_{it} = \beta_0 + \beta_1 x_{it} + v_{it}$  where  $v_{it} = \mu_i + \epsilon_{it}$  and  $Cov(x_{it}, \mu_i) \neq 0$ . Here,  $\mu_i$  captures the unknown individual specific effects and  $\epsilon_{it}$  is the idiosyncratic error uncorrelated with both  $x_{it}$  and  $\mu_i$ . If the parameters of this model are estimated using the ordinary least squares (*OLS*) method, then the estimated slope coefficient will be (GATE EE 2025)
- a) biased
- b) inconsistent
- c) unbiased but consistent
- d) unbiased but efficient
- 40) Which of the following factor (s) do NOT affect output and employment in the classical macroeconomic model? (GATE EE 2025)
- a) Quantity of money
- b) Level of government spending
- c) Level of demand for investment goods
- d) Technological progress
- 41) For the following function  $f(x)$  to be a *probability density function*, the value of  $c$  will be \_\_\_\_\_. (rounded off to two decimal places). (GATE EE 2025)
- $$f(x) = \begin{cases} \frac{c}{\sqrt{x}}, & 0 < x < 4 \text{ and } c > 0 \\ 0, & \text{otherwise} \end{cases} \quad (1)$$
- 42) A six-face fair die is rolled once, with  $X$  being the number that appeared on the uppermost surface. Then the variance of  $X$  is \_\_\_\_\_. (rounded off to three decimal places). (GATE EE 2025)
- 43) Consider a Cobb-Douglas utility function given as  $U(H) = (24 - H)^{1-\alpha} (wH)^\alpha$ , where  $H$  is the number of hours spent working per day, and  $w$  is the wage rate per hour. If  $\alpha = \frac{1}{2}$ , then the corresponding labour supply (*inhours*) is \_\_\_\_\_ (in integer). (GATE EE 2025)
- 44) For a given foreign currency, if the forward exchange rate of delivery is 20 and the current value of spot exchange rate is 18, then the forward premium will be \_\_\_\_\_. (rounded off to two decimal places). (GATE EE 2025)
- 45) Two friends Aditi and Raju are deciding independently whether to watch a movie or go to a music concert that evening. Both friends would prefer to spend the evening together than apart. Aditi would prefer that they watch a movie together, while Raju would prefer that they go to the concert together. The payoff matrix arising from their actions is presented below.  $p$  and  $(1 - p)$  are the probabilities that Aditi will decide in favour of the movie and concert, respectively. Similarly,  $q$  and  $(1 - q)$  are the probabilities that Raju will decide in favour of the movie and concert, respectively. Which one of the following options correctly contains all the Nash Equilibria?

	Movie	Concert
Movie	2,1	0,0
Concert	0,0	1,2

(GATE EE 2025)

- a)  $(p = 0, q = 0);$   
 $(p = 1, q = 1);$   
 $(p = \frac{2}{3}, q = \frac{1}{3})$
- b)  $(p = 0, q = 1);$   
 $(p = 1, q = 0);$   
 $(p = \frac{2}{3}, q = \frac{1}{3})$
- c)  $(p = 0, q = 0);$   
 $(p = 1, q = 1);$   
 $(p = \frac{1}{3}, q = \frac{2}{3})$
- d)  $(p = 0, q = 1);$   
 $(p = 1, q = 0);$   
 $(p = \frac{1}{3}, q = \frac{2}{3})$

46) Consider a two good economy where  $a$  denotes consumption of apricots and  $b$  denotes consumption of bananas. Anu's utility function is  $U^{Anu}(a, b) = a + 2b$ , and Binu's utility function is  $U^{Binu}(a, b) = \min(a, 2b)$ . Anu initially has no apricots and 12 bananas. Binu initially has 12 apricots and no bananas. In the competitive equilibrium, which one of the following will be Anu's optimal consumption bundle? (GATE EE 2025)

- a) 6 apricots and 9 bananas      b) 9 apricots and 9 bananas      c) 4 apricots and 10 bananas      d) 0 apricots and 12 bananas

47) A dual economy consisting of a manufacturing sector ( $M$ ) and an agricultural sector ( $A$ ) is depicted in the figure below.  $O_M O_A$  is the total labour available in the economy of which  $O_M L_{SM}$  is the labour supply in the manufacturing sector before any migration was allowed among the labourers. The vertical axis in the left (right) side measures the wage in the manufacturing,  $W_M$  (agricultural,  $W_A$ ) sector.  $LD_M$  ( $LD_A$ ) is the demand of labour in the manufacturing (agricultural) sector with respect to  $O_M$  ( $O_A$ ) as the origin. If wages are flexible, and labour is allowed to migrate between these two sectors, then it will be TRUE that

Fig. 2. Graph

(GATE EE 2025)

- a) Total amount of labour that will migrate from the agricultural sector to the manufacturing sector will be  $L_A L_{SM}$
- b) Total amount of labour that will migrate from the manufacturing sector to the agricultural sector will be  $L_{SM} L_A$
- c) The wage in the manufacturing sector will be  $W_3$
- d) The wage in the agricultural sector will be  $W_1$

48) If  $X$  and  $Y$  are two random variables with the joint probability density function

$$f(x, y) = \begin{cases} \frac{2}{3}(x + 2y); & 0 < x, y < 1 \\ 0; & \text{otherwise} \end{cases} \quad (2)$$

then  $E\left[X|Y = \frac{1}{2}\right]$  will be (GATE EE 2025)

- a)  $\frac{5}{9}$                       b)  $\frac{4}{9}$                       c)  $\frac{1}{3}$                       d)  $\frac{2}{3}$

49) If a discrete random variable  $X$  follows the uniform distribution and assumes only the values 8, 9, 11, 15, 18, and 20, then  $P(|X - 14| < 5)$  is (GATE EE 2025)

- a)  $\frac{1}{2}$                       b)  $\frac{1}{5}$                       c)  $\frac{1}{4}$                       d)  $\frac{2}{3}$

50) Assume the following probabilities for two events,  $A$  and  $B$ :  $P(A) = 0.50$ ,  $P(B) = 0.70$ , and  $P(A \cup B) = 0.85$ . Then we can conclude that (GATE EE 2025)

- a)  $A$  and  $B$  are mutually independent      b)  $A$  and  $B$  are equally likely      c)  $A$  and  $B$  are not mutually independent      d)  $A$  and  $B$  are mutually exclusive

51) The following table provides different statistical model specifications along with the elasticity of  $y_t$  with respect to  $x_t$ . Which one of the following options is correct?

Row	Statistical Model	Elasticity
1	$y_t = \beta_1 + \beta_2 \frac{1}{x_t} + \epsilon_t$	$-\frac{\beta_2}{x_t^2}$
2	$y_t = \beta_1 - \beta_2 \ln(x_t) + \epsilon_t$	$\frac{\beta_2}{x_t}$
3	$\ln(y_t) = \beta_1 + \beta_2 \ln(x_t) + \epsilon_t$	$\beta_2$
4	$\ln(y_t) = \beta_1 + \beta_2 x_t + \epsilon_t$	$\beta_2 x_t$
5	$\ln(y_t) = \beta_1 + \beta_2 \ln(x_t) + \epsilon_t$	$\beta_2 \exp(x_t)$
6	$\ln(y_t) = \beta_1 + \beta_2 x_t + \epsilon_t$	$\frac{\beta_2}{\exp(x_t)}$

(GATE EE 2025)

- a) Only rows 3 and 4 are correct                      c) Only rows 3 and 5 are correct  
b) Only rows 1 and 2 are correct                      d) Only rows 4 and 6 are correct

52) An incumbent firm ( $I$ ) faces the possibility of entry by a challenger firm ( $C$ ). If  $C$  enters,  $I$  may either accommodate or fight. If  $C$  does not enter, its payoff is 1, while  $I$ 's payoff is 2. If  $C$  enters, and  $I$  accommodates, their payoffs are 2 and 1, respectively. However, if  $C$ 's entry is met with a fight by  $I$ , their payoffs are 0 and 1, respectively. Which one of the following is a *subgame perfect Nash equilibrium* (SPNE) under perfect information? (GATE EE 2025)

- a) enter; accommodate                      c) not enter; accommodate  
b) enter; fight                      d) not enter; fight

53) For the function  $F : \mathbb{R}^2 \rightarrow \mathbb{R}$  specified as  $F(x, y) = x^3 - y^3 + 9xy$ , which of the following options is/are correct? (GATE EE 2025)

- a) one saddle point                      c) one strict local maximum  
b) one strict local minimum                      d) one global maximum

- 54) A decrease in the income tax rate has a \_\_\_\_\_ effect on the labour supply if the \_\_\_\_\_ effect dominates. (GATE EE 2025)
- a) negative; income      b) positive; substitution      c) positive; income      d) negative; substitution
- 55) Which of the following statements is/are FALSE? (GATE EE 2025)
- a) The arbitrage pricing theory says that the prices which producers in different countries set for a particular product will be the same if the prices are expressed in the same currency using the current exchange rate
- b) The interest rate parity theory says that the interest rates on similar assets in two countries will always be the same
- c) The Purchasing Power Parity theory says that the total prices of any basket of products which may split in two different countries will be the same, if the prices are expressed in the same currency using the current exchange rate
- d) The real exchange rate between two countries is the rate at which a particular basket of products produced in one country can be traded with a similar basket produced in another country
- 56) Consider the Solow growth model in which output ( $Y$ ) is determined by the production function  $Y_t = 0.2K_t^{0.8} + 0.8L_t$ , where  $K_t$  and  $L_t$  denote capital and labour used in the production process, and  $t$  depicts time. The depreciation is given by  $\delta K_t$ , where  $\delta = 0.2$ . Saving is given by  $sY_t$ , where  $s$  is the saving rate. If the population does not grow with time, the steady state capital per unit of labour is \_\_\_\_\_ (in integer). (GATE EE 2025)
- 57) Suppose XYZ Corp. is totally financed by equity, it is earning Rs. 2.50 per share; the current market price of the share is Rs. 20.00. There are 10,000 shares outstanding, and the replacement cost of the firm's real assets is Rs. 1,25,000. XYZ Corp.'s value of Tobin's  $q$  is \_\_\_\_\_ (in integer). (GATE EE 2025)
- 58) An industry comprising only two firms produces a homogeneous product where the market demand function is given by  $p = 200 - 2(q_1 + q_2)$  where  $q_1$  and  $q_2$  are the output levels of firm 1 and firm 2, respectively. The individual firm's cost functions are  $TC_1 = 4q_1$  and  $TC_2 = 4q_2$ , where  $TC_1$  and  $TC_2$  are total costs of firm 1 and 2, respectively. If firm 2 is a Stackelberg Leader, and firm 1 is a follower, then the profit of the Stackelberg Leader will be \_\_\_\_\_ (rounded off to two decimal places). (GATE EE 2025)
- 59) Let  $x$  and  $y$  be two dummy variables that take the values of either 0 or 1, and follow the bivariate frequency distribution as given below. If a logit regression is estimated with  $y$  as the dependent variable and  $x$  as the independent variable, then the estimated coefficient of  $x$  is \_\_\_\_\_ (rounded off to two decimal places).

	0	1	Total
0	6	11	17
1	6	7	13
Total	12	18	30

(GATE EE 2025)

- 60) Based on the table given below, the current account deficit in nominal terms as a percentage of GDP during 2012-13 will be \_\_\_\_\_ (rounded off to three decimal places).

Expenditure on Gross Domestic Product ( <i>Rupees in Crores</i> )	2010-11	2011-12	2012-13
<b>At Current Prices</b>			
1. Final Consumption Expenditures	4865	5857	6626
2. Gross Fixed Capital Formation	1388	1669	1813
3. Changes in Stocks	65	75	87
4. Exports of Goods & Services	1326	1698	1674
5. Imports of Goods & Services	1786	2317	2300
<b>At Constant 2004-05 Prices</b>			
1. Final Consumption Expenditures	4039	4340	4377
2. Gross Fixed Capital Formation	1026	1101	1035
3. Changes in Stocks	52	52	58
4. Exports of Goods & Services	1044	1239	1193
5. Imports of Goods & Services	1348	1594	1544

(GATE EE 2025)

- 61) In an economy, the effort level of a worker in firm  $i$  is denoted by  $e_i$  and depends on the wage  $W_i$  received by the worker from the firm, and the minimum wage  $W_0$  is set by the government. The effort function is given by  $e_i(W_i, W_0) = \sqrt{W_i - W_0}$ . If the firm employs  $N_i$  unit of workers, then the efficiency unit of labour employed by the firm is  $e_i N_i$ . The production is based on only the efficiency unit of labour, and the production function is given by  $F(e_i N_i) = \log_e(e_i N_i)$ . If the minimum wage set by the government is 10, and the profit maximizing firms sell the good in a competitive market at price  $P$  by choosing  $W_i$  and  $N_i$ , then the profit maximizing wage set by the firm will be \_\_\_\_\_ (rounded off to one decimal place). (GATE EE 2025)
- 62) In a perfectly competitive market, suppose the market demand curve is given by  $P = 10 + W - Q$ , where  $P$  is the market price,  $W$  is the average wealth of the consumers in the market, and  $Q$  is the industry output. The total cost function for a representative firm is given by  $C(q) = q^3 - 2q^2 + 5q$ , where  $q$  is the output of a firm. If  $W = 80$ , then the total number of firms in this industry in the long-run will be \_\_\_\_\_ (in integer). (GATE EE 2025)
- 63) The estimated results of a Probit model is given in the table below, where  $Y$  is a binary variable taking the value either 0 or 1, and  $X$  is an integer. The probability that  $Y = 1$  when  $X = 30$  is \_\_\_\_\_ (rounded off to two decimal places).

Variable	Coefficient	Standard Error	Z-Statistic	Probability
Constant	-0.064	0.399	-0.161	0.871
$X$	0.029	0.010	2.916	0.003

(GATE EE 2025)

- 64) Consider an industry with six firms. An analyst collated the data for this industry as given below. The Herfindahl-Hirschman Index ( $HHI$ ) for this industry will be \_\_\_\_\_ (in integer).

Firm	Market Share
F1	30%
F2	20%
F3	15%
F4	15%
F5	10%
F6	10%

(GATE EE 2025)

- 65) Consider a duopoly market where Firm 1 and Firm 2 produce differentiated products such that the demand function of each firm is given by:

$$q_1(p_1, p_2) = 18 - p_1 + p_2 \quad q_2(p_1, p_2) = 18 + p_1 - p_2$$

Here,  $q_1$  and  $q_2$  are the outputs produced by Firm 1 and Firm 2, respectively, and  $p_1$  and  $p_2$  are the corresponding per unit prices. Cost of production for the  $i$ th firm is given by  $C_i(q_i) = 2q_i \quad \forall i = 1, 2$ .

The firms compete in prices. The price set by Firm 2 such that the market is in Nash equilibrium will be \_\_\_\_\_ (*in integer*). (GATE EE 2025)
